

*SEEING A
DIFFERENCE
STARTS WITH*

SEEING ANYWHERE

We don't see distance as an obstacle. Or a vehicle as mandatory for exceptional care. The best care should come to you. That's why we work tirelessly to stay at the forefront of breakthrough research and technology, with developments like Telemedicine expanding our virtual footprint to the far corners of the Commonwealth, enabling us to provide more care to more people, everywhere they need us, every day.

**SEEING A
DIFFERENCE
STARTS WITH**

SEEING THE EYE

We are Doctors. Nurses. Researchers. Teachers. Students. Pharmacists. Technicians. Environmental Service Providers. At UVA Health System, we are many sharing one vision. A synchronized team of experts, interconnected and invigorated by each other to deliver every aspect of care at the highest level. Meeting together each morning to ask, how can we provide even better care? How can we make this the safest, most welcoming patient care environment yet? No matter our title, no matter our role, we are called to provide the most exceptional care possible, to all.

**SEEING A
DIFFERENCE
STARTS WITH**

SEEING DIFFERENTLY

Making a change means seeing each day as an opportunity to do things better than they've ever been done before. Healing and curing, researching and proving, educating and learning. And it all starts with seeing things from a different angle. Under a different light. At UVA Health System, we work with researchers from all disciplines, all throughout the University, every day, to make the kind of life-giving, bold new discoveries the world needs. So we can do right by our patients and their families. So we can make Virginia an even healthier, stronger place. And so we can help people all around the world live better lives.

EVERYTHING

leader

FRIEND
LIFESAVER

Nurses aren't just the backbone of medicine and the front lines of care. Nurses are confidants, advocates, lifesavers, and innovators. You see it in the smiles. In the birthdays they remember. In the handwritten thank you notes they get from kids. Called to serve and driven to always do more for their patients, nurses are vital members of the team at UVA Health System. It's why we do everything we can to support your education, professional development, research, and community engagement. Because we know, for you, nursing is more than a job. It's a way of life.

FOR ANGELA WATSON

6 MONTHS TO LIVE

IS 2012

When fashion student Angela Watson was given six months to live, her family longed for a better way, a shift in perspective that could save their daughter's life. So they came to UVA Cancer Center, a home for truly reimagined care. Our tight-knit family of experts quickly started using Angela's own white blood cells to treat her cancer. Now cancer free, Angela's back in class, back in the closets, and planning her first runway show. "Without UVA," she says, "none of this would be possible."

YOUR EYES ARE THE WINDOWS TO NEW SOLUTIONS

As a nurse, you are one of the first people our patients see. From pediatrics to orthopedics to mobile outreach, you see what's working and you know what needs changing. And you're always finding new ways to care for people. That's why nurse researchers are uniquely positioned to drive innovation in the lab. Changing how we investigate, finding new solutions, and improving how we care. And it's why we encourage all our nurses to join the Nursing Research Program.

Contact Program Director Beth D. Quatrara, DNP, RN, for more information: BAD3E@virginia.edu.

ONE SMART MOVE IS ALL IT TAKES
TO MOVE FORWARD

Whether you're an injured athlete, you've suffered from arthritis for years or you have severe spinal trauma, we're here to help you push forward. Our surgeons, nurses and specialists work as a team and use the most advanced medical technology and tailored care techniques to treat it all. In many cases it just takes one visit to our clinic to start moving beyond pain and get active again.

UNIVERSITY OF VIRGINIA HEALTH SYSTEM ORTHOPEDICS

Alzheimer's Can Lock You Out Of Your Own Mind.

WE LET YOU BACK IN.

Our recent breakthroughs in Alzheimer's research have brought us closer than ever to ending this debilitating disease that impacts nearly 44 million people and their families. By using a simple supplement, we've discovered a way to help prevent neuron-loss, reducing symptoms and the hardship for caregivers. It's another way our neurology team is unlocking the secrets of the human brain.

And it's another reason you're better here.

UVA HEALTH SYSTEM

MORE mesenteric angioplasties than anywhere in the country

MORE chest operations than anywhere in the region

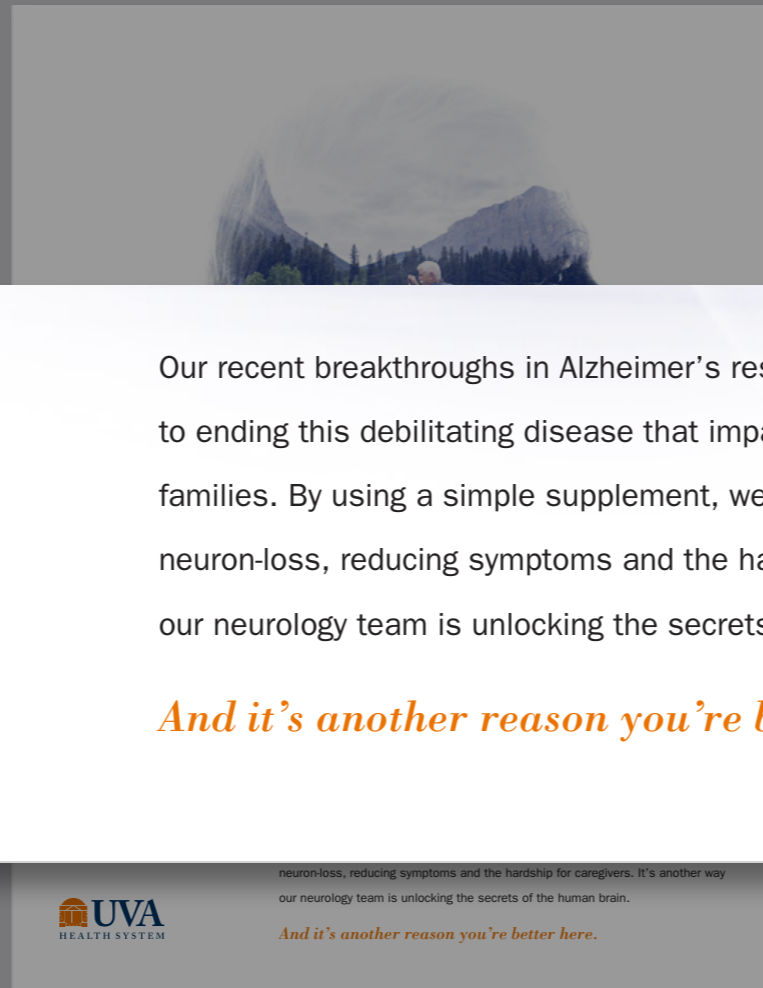

MORE open aortic procedures than anywhere in the state

MORE HEART THAN ANYWHERE IN THE REGION

At UVA Heart and Vascular Center,

you're not just in good hands. You're in the most compassionate, committed hands in the field. As an academic hospital, we're able to translate groundbreaking research discoveries into the most advanced treatments available today. We treat more complex heart conditions than anywhere in the region and are home to some of the most respected cardiac and vascular specialists in the world. So whether you're experiencing chest pain, shortness of breath, or you just need a second opinion, we are here to get you back to your life, your family, your future.

UVA HEALTH SYSTEM HEART & VASCULAR CENTER

Our recent breakthroughs in Alzheimer's research have brought us closer than ever to ending this debilitating disease that impacts nearly 44 million people and their families. By using a simple supplement, we've discovered a way to help prevent neuron-loss, reducing symptoms and the hardship for caregivers. It's another way our neurology team is unlocking the secrets of the human brain.

And it's another reason you're better here.

BECOMING EXPERTS

IN EVERY DEGREE OF BETTER

As a medical student, you want to do your research and clinical work with the same equipment and technology doctors use every day. And you want to learn in the hospital while also making a positive impact in the community. At the UVA School of Medicine, that's exactly what we deliver—the highest

level of medical education for the most professional experience possible.

Our "Next Generation" curriculum eschews the traditional split approach, and shows students what it really means to be a working physician. By combining

science with clinical education in a multitude of settings, including small-group lectures, self-directed learning, lab work and hospital experience, students are able to broaden their clinical skills and strengthen their ability to work as a team.

And thanks to constant collaboration with our dedicated top faculty members—who are selected, in part, based on professional experience—UVA medical students graduate with a deeply personal understanding of what it means to become the medical professionals of the future.

GETTING KIDS BACK TO BEING KIDS

EXPLORE MORE!

Keep creative, stay curious and ask questions about the world around you.

MOVE AROUND!

Turn off the TV, find a fun activity, and play for 30 min. every day.

SNACK SMART!

Choose carrots over chips and nuts or fruits instead of candy.

GIMME FIVE!

Have fun finding five fruits and veggies to eat each day.

TWO MINUTES TWICE DAILY!

It's smart and easy to brush your teeth so why not do it twice?

RESPECT

driven by each other

The care we give is more than care. It's a mission. It's a passion, uniting perspectives. It's taking the heart and the drive to join together as a team and looking out there to others. It's approaching every day and every challenge to do work together and do things better than ever. To improve the way people are cared for. TO **RETHINK HEALTH CARE**.
